Covering the entire spectrum of otolaryngology, Cummings Review of Otolaryngology is your go-to resource for efficient and effective preparation for in-service exams, the ABO oral and written boards, and the recertification exam. Using a logical, systematic approach, this unique review by Drs. Harrison W. Lin, Daniel S. Roberts, and Jeffrey P. Harris covers the most essential clinical information - such as differential diagnosis, clinical algorithms, and treatment options - in an easy-to-remember list format, helping you quickly respond to questions in a clinical and testing situation, teach other residents and medical students, or assist in patient management. Promotes efficient, immediate recall of material through a uniquely organized format, encouraging a way of thinking that is central to success on oral boards, on clinical rotations, and in patient care. Helps you answer questions such as: What questions do I need to ask in the history? What findings am I looking for on physical exam? What is the differential diagnosis? What are the critical findings on radiology and pathology studies? What are the treatment options? How do I perform this? and more, giving you a wealth of knowledge that can be accessed and used in any clinical or exam scenario. Includes practical sections on how to achieve success on the oral exam, as well as the most important pathology and radiology slides for in-service and board examinations. Features hard-to-find review coverage of sleep medicine, allergy, and dental/oral surgery. Ideal for review before clinical rounds with the attending surgeon, a complex surgical case, a mock oral board examination, or the American Board of Otolaryngology examinations.
