Customer Reviews

This truly is the first book written by an ambulance marketing professional FOR ambulance company operators. Provides a clear and concise marketing strategy for developing a sales plan. Kudos to The author!

The paste is too thin, but the content is a right point of view of the marketing because even when most of the people thinks it just have to be based in desk analysis of charts, and, projects of

billboards, etc. The author put the emphasis in what really is: "It's a people business". Don't talk about where, or, how to obtain the generation of patient transports in any city out of the USA. But have sense how to work within the ambulance marketing.
