A Woman's Decision: Breast Care, Treatment & Reconstruction, Fourth Edition

Synopsis

Answers to your patients' most vital, heartfelt questions! For years, *A Woman's Decision* has been the "go-to" reference for doctors, nurses, and patients as they deal with the physical and emotional trauma surrounding breast cancer and reconstruction. Co-authored by renowned surgeons and a noted publisher and medical editor, this popular and authoritative book has become a trusted resource and valuable patient education tool. Featured on numerous national talk shows (including Oprah), the authors candidly discuss the full range of breast care, breast cancer treatment, and breast reconstructive options. Many doctors and breast centers use this book as their preferred method of informed consent. Patients love it, and breast centers, support groups, physicians, and societies recommend it. It is also a great gift for your surgical, oncologic, and radiologic colleagues. This new fourth edition has been totally revised and updated to reflect the latest developments in breast cancer treatment and recent advances in breast reconstruction. Written in an accessible manner, it provides women and their families with the information they need to make decisions about their own health care. Best of all, it takes complex and frightening topics and explains them in an understandable and non-threatening manner, providing women with the knowledge they need to feel confident in their decisions, their therapies, and their caregivers. It covers doctor-patient communication, mammography and breast self-examination, breast lumps, cancer facts and treatment options, and even the effects of breast cancer on relationships with family and friends. New information has been added on genetics and genetic counseling, oncoplastic surgery, new approaches to chemotherapy and breast irradiation, and new breast reconstruction techniques, including perforator flap reconstruction, reconstruction with the newer gel-filled implants, and prophylactic or preventive mastectomy. In addition to descriptions of the different cancer therapies and reconstructive techniques, the book includes numerous drawings which detail the steps involved for each procedure with preoperative and postoperative photos showing the possible results from the different reconstructive approaches. Fifteen patient interviews provide comfort to patients as they ride the physical and emotional roller coaster of breast cancer treatment, recovery, and reconstruction. Each woman has a unique story to tell with a different focus for each interview and coverage of a wide range of different reconstructive options. Many readers have commented that these interviews were "lifesavers" for them because they took away the fear of the unknown. They were reassured by the comments of other women who had walked in their shoes and offered advice to help cope with their treatments. They also appreciated the candid comments these women made about the different reconstructive therapies, fully sharing their experiences and detailing their decisions, therapies, pain, recuperation, complications, and coping

mechanisms. If you know someone who is experiencing the fear and trauma of breast cancer, do her a favor and order this book. *A Woman's Decision* has become a preferred patient education tool used by plastic surgeons, cancer surgeons, and breast cancer centers worldwide. This sensitive and information-packed book promotes better doctor-patient communication and helps you provide informed consent to your patients, saving you time and money.

Customer Reviews

I was given this book to read from my surgeon. It really helped me to understand a lot about breast cancer and the decisions to be made. I have ordered two of these books to pay it forward for other women to read. I will order more for the same reason and to keep one for myself. Hopefully I will not have to share it with family. The book is an excellent source of information for breast cancer patients, family and friends.

Full of information helping one make a clearer choice or understanding what one may go through©

I haas hard decision to make and this book help with my choices and decisions

Alot of information for BC patients.
