Laparoscopic Hernia Repair
Laparoscopic hernia repair is a relatively new surgical technique to fix tears in the abdominal wall using small incisions, a patch and special cameras to view inside the body. It frequently offers a more rapid recovery for the patient, less postoperative pain, and a quicker return to work and normal activities. (LapSurg.org). This concise guide discusses the latest procedures in laparoscopic hernia repair. Beginning with chapters on the history of hernia, imaging and equipment, the following sections discuss surgical procedures for different types of hernia. Nearly 400 colour images and illustrations are included, as well as two DVD ROMs demonstrating different laparoscopic procedures and discussing potential complications. Key points * Guide to latest procedures in laparoscopic hernia repair * Covers techniques for different types of hernia * Nearly 400 colour images and illustrations * Includes DVD ROMs demonstrating procedures and discussing complications
