The SAGES Manual Of Perioperative Care In Minimally Invasive Surgery (Whelan, The Sages Manual)
Synopsis

The second SAGES (Society of American Gastrointestinal Endoscopic Surgeons) manual was intended to be a companion piece for the successful first SAGES manual, edited by Carol Scott-Connor, that was published more than 4 years ago. Originally, the goal was to concentrate on tersely covered or often ignored aspects of the preoperative preparation of the patient and the operating room as well as the postoperative care of patients undergoing minimally invasive operations. It was also our intention to include a section for each procedure where several different port placement schemes would be presented and briefly discussed. Unique to this manual, the impact of the patient’s body habitus (short or long, narrow or wide) on port placement is also taken into account for many of the procedures. Also unique are chapters devoted to hypothermia, port wound closure, and the management of subcutaneous emphysema and abdominal wall hemorrhage caused by trocars. Naturally, the surgeon tends to focus on the technical aspects of the procedure, such as the operative tasks to be carried out, the order of operation, and the position of the surgeon and assistant. However, it is critical that the surgeon be aware that the CO pneumoperitoneum, far more so than laparotomy, results in multiple physiologic alterations that, if not compensated for by the anesthesiologist and surgeon, may endanger the patient or prevent the laparoscopic completion of the procedure.

Book Information

Series: Whelan, the Sages Manual
Paperback: 492 pages
Publisher: Springer; 2006 edition (June 2, 2010)
Language: English
ISBN-10: 0387236864
Product Dimensions: 5 x 1.2 x 8 inches
Shipping Weight: 1 pounds (View shipping rates and policies)
Average Customer Review: 5.0 out of 5 stars See all reviews (1 customer review)
Best Sellers Rank: #263,252 in Books (See Top 100 in Books) #4 in Medical Books > Medicine > Surgery > Laparoscopic & Robotic #205 in Textbooks > Medicine & Health Sciences > Medicine > Clinical > Surgery > General #299 in Medical Books > Medicine > Surgery > General Surgery
