Health Sciences Literature Review Made Easy (Garrard, Health Sciences Literature Review Made Easy)

Synopsis

Health Sciences Literature Review Made Easy, Fourth Edition is an essential text for your nursing research course and provides students with a solid foundation and the tools they need to evaluate articles and research effectively. The Fourth Edition builds on the digital updates made to the previous edition and highlights the Matrix Method and the skills necessary to critically evaluate articles. The text also covers Method Maps, which teach students how to effectively construct a research study. The author leads students through the process of how to manage a quality literature review in the context of evidence-based practice. A case study highlighting a typical graduate student is woven throughout the text to illustrate the importance of literature reviews and evidence-based practice. Health Sciences Literature Review Made Easy, Fourth Edition is appropriate for graduate level nursing courses as well as undergraduate Nursing Research courses that require literature reviews. Key Features:

- Data Visualization: A Digital Exploration is an interactive, online appendix
- The Matrix Method teaches the essential skills around literature evaluation
- A real-life scenario case study is woven throughout each chapter to reinforce key concepts
- Completely updated chapter on the guidelines for Methodological Review
- Method Maps are introduced to convey the thought process around designing a research study

Online Bonus! Each text purchase includes access to an online supplement for students. The Fourth Edition features a cutting-edge, interactive appendix. This digital exploration of Data Visualization includes new content, podcasts from the author, and supplemental resources such as TED talks. This is a fantastic student resource! Customer Reviews

It's a great resource for systematic and integrative reviews. If you're very new to this type of research, it's easy to read and provides a lot of very helpful and clear strategies for undertaking the project.

I think the writing in this book is terrible, but doing a matrix is very helpful in writing a lit review. That's the only part I found useful - you could probably figure that part out without buying the book though.

Not every text I buy for school is worth it later. This is easy to read, easy to understand, and makes research manageable. I will refer to this after graduation!

This is a great book and outlines step by step on how to conduct a literature review for nurses. I will definitely purchase future updated editions.

This was required reading for a class. It was easy to follow and interesting. i would recommend for anyone who is new to writing for publication.

Wish I had known about this method when I did my first Literature Review! Excellent techniques and easy read.

Great book to help with these projects. Clear and easy to understand instructions.
