Ophthalmology Review Manual
Synopsis

The Second Edition of the respected Ophthalmology Review Manual provides an organized reference to aid in clinical disease management and board exams preparation. The book’s outline format emphasizes relevant information and facilitates rapid retrieval of key facts. Each section starts by detailing relevant anatomy and physiology “the essential framework for understanding the basis for the related diseases” and then summarizes specific disease entities in outline format, with major features highlighted. Over 200 commonly encountered disease entities are listed, along with corresponding page numbers, on the inside front cover of the book for rapid reference. This practical manual delivers useful appendices address infectious agents, their microscopic appearance, causes and treatment, as well as common drugs, dosages, indications and side effects. Board Exam topics and organization streamline subject review and exam preparation (including all material listed in the OKAP Subject Outline published by the AAO). A convenient outline format presents relevant clinical information in consistent and concise manner. Over 350 figures highlight classic findings and important relationships. A companion website includes a detailed image bank to enhance visual diagnosis of common pathologic features. NEW to the Second Edition: NEW contributors share their expertise. NEW sections highlight clinical trials and state of the discipline.

Customer Reviews

This was my primary review book for the boards. With last minute optics and the photos from the
path BCSC book, I felt very prepared during the test. I would highly recommend that you read over this book once or twice before the exam.

Helpful when I need to fill in knowledge gaps quickly in spare moments during and after clinic as well as OKAP prep

Very high yield review book with logical organization and systematic approach to reviewing clinical ophthalmology. There is no section on optics or pathology, but despite this shortcoming I can give no less than 5 stars. Dr Chern has done more for resident education with his books than almost any other single person in the field of Ophthalmology. When coupled with the Chern question book you should do well on the OKAPs and boards.

Good book, five stars. Excellent resource.

This is the best review book in ophthalmology. (I have 3 other ophtho review books that were hardly ever used in favor of the Chern book.) A must-have for any ophthalmology resident.
