Woman Of Valor: Margaret Sanger And The Birth Control Movement In America
Synopsis
Ellen Chesler’s 1992 biography of Margaret Sanger is acclaimed as definitive and is widely used and cited by scholars and activists alike in the fields of women’s health and reproductive rights. Chesler’s substantive new Afterword considers how Sanger’s life and work hold up in light of subsequent developments, such as U.S. Supreme Court cases challenging the constitutional doctrine of privacy and international definitions of reproductive health as an essential human right.

Customer Reviews
Meticulously researched and footnoted, this somewhat ponderous tome (about 670 pages including the notes and index) does not make for a quick beach read. It’s fascinating to learn how very many of the rights modern women take for granted come from the work of this brave and dedicated woman, who began the movement and started the clinics that eventually morphed into Planned Parenthood, both in the USA and internationally. People - even doctors - didn’t even TALK about the phrase (ssssh) BIRTH CONTROL a hundred years ago. Sanger changed that, brought an awareness of the need to offer women reproductive choices other than abstinence, too many babies, or illegal and risky abortions. Sanger’s reputation has been much besmirched in the last few decades by those who hate that women are making their own choices as to when - or whether to become mothers. As Chesler presents her, Sanger was far from perfect; she made enemies as well as friends and supporters. She was loath to give up the glory/credit for work that others joined in as well. (Sanger may have been one of the earliest pioneers of name branding.) Redheaded, witty and attractive, she did not believe in monogamy (at least for herself) and engaged in countless affairs,
including one with writer H.G. Wells, somehow managing it that none of her men became jealous of her other lovers or husbands; they were all happy, or at least content, having a tiny bit of her time and attention. Whether you believe this disgustingly immoral or not, it's still an amazing feat for anyone to pull off. She was not a good mother, neglecting her children for the cause of B.C. But she was not a supporter of Nazism, race eugenics, or racism - those are all LIES propagated by those with an axe to grind.
